Important:

- Scheduling, priority code calendar and more information can be found on our Ford Fleet Website www.fleet.ford.ca (contact our Fleet Headquarters to request your access focfhq@ford.com)
- This document is meant to serve as a point of reference to help determine when orders may be submitted to the plant. Every attempt is made to honor requested production period. Due to unforeseen circumstances such as plant downtime/commodity issues etc., this may not be possible.
- Orders are selected for scheduling based on production month request (priority code) first, then by receipt date. Despite how long an order has been unscheduled, if the plant is not yet filling the production week associated with the requested priority code, the order will remain unscheduled.
- The information and estimated timing indicated above are correct at time of publication. Availability and timing are subject to change without notice. Acceptance of an order by Ford Motor Company does not constitute a commitment to build or a guaranteed delivery date.
- Due to varying demand, the fleet final order due date may change with little or no advance notice. Every effort is made to accurately estimate the lead times, and reflect longer lead times of specific commodities.
- For larger accounts it is recommended that ordering needs are discussed in advance with Ford.
- For ship thru orders, please check with your upfitter and add extra build/transit time to the Ford lead time for a more accurate OTD estimate.
- To limit commodity issues, fleet scheduling may be moved to the first half of the requested months production.

Fleet Bronco orders will only be schedule after we have scheduled retail orders for customers that went through our reservation process. No Daily Rental orders will be scheduled for now. Production is very limited
For an Estimated Lead Time, please add on average 1 1/2 month to the new order production month.
